

BRAND IDEA PROFITABILITY ANALYSIS: THE GOOD DICTIONARY

Brand Idea Profitability Analysis by Portboost

Created For: Brand Founder

BRAND IDEA PROFITABILITY ANALYSIS: THE GOOD DICTIONARY

HERE ARE THE TOP 5 SOCIAL MEDIA PAGE CONCEPTS THAT ARE IN THE SAME LANE AS THE GOOD DICTIONARY:

1. *The Good Questions*

Description: A page that posts one deep, open-ended question a day - always tied to emotional wellness, mindset, or self-reflection.

Examples:

“What part of your past still needs your forgiveness?”

“What does peace actually feel like in your body?”

- **Standout:** Makes followers pause and go inward. Highly shareable via stories and perfect for comment engagement.

2. *The Good Rewrites*

Description: Takes common negative self-talk phrases and rewrites them in the Good Dictionary voice.

“I’m so behind” → “I’m exactly where I need to be to learn what I’m here to learn.”

- **Standout:** Super on-brand for the *word-definition* style but spun into **daily mental rewrites**. Could be static, carousel, or reels.

3. *The Good Heart (Visual Stories)*

Description: Tells mini visual stories using the faceless heart character — no words, just emotional micro-moments told in 1–5 frames.

Examples:

Heart gives a piece of itself away → fades → finds it again.

Or Heart sits alone → someone places “Good Dictionary” in its hands → light glows.

- **Standout:** Powerful **storytelling without language**. Great for Reels/TikTok. Builds deep emotional connection & brand identity.

4. The Good Conversation

Description: A faceless but heartfelt dialogue-style page. Posts short “you vs. you” convos or therapist-style inner chats.

Examples:

You: I feel like I’m not doing enough.

Heart: But you’re healing. Healing counts, too.

- **Standout:** Builds on emotional duality and self-compassion. Think *text-style carousels* that hit hard and circulate fast.

5. The Good Feelings Dictionary

Description: Instead of random words, every post defines a specific feeling in the Good Dictionary tone — like:

Bittersweet: “The quiet ache of knowing something is over, but still being grateful it happened.”

- **Standout:** Narrows the niche to **emotional literacy**, giving the page room to scale into education, mental health tools, or community building.

Most Scalable Page Idea:

The Good Rewrites — it keeps the original style but hits a *universal pain point*: negative self-talk. Highly shareable, immediately helpful, and extremely brandable.

NOTE: This is just a few optional ideas for you to review and if wanting to test/implement.

THE GOOD DICTIONARY: SELF-WORTH & MINDSET MIRROR PAGED

The Good Dictionary is a social media page. It can be seen as a digital mirror — a place where followers don’t just read poetic definitions, they **see themselves more clearly**. The page focuses on

mental health, self-worth, and reflection by using emotionally resonant “word + definition” posts that speak to the heart.

Description:

- A faceless heart character holds *The Good Dictionary*, delivering short, powerful definitions around topics like self-doubt, healing, gratitude, identity, and boundaries. These posts function like gentle truth bombs — inviting reflection.

Key Elements of the Brand's Impact:

- **Poetic Definitions with Punch:** Definitions written like emotional affirmations.
- **A Faceless Heart Character:** A blank-slate character that followers can project themselves onto. Please make sure whatever logo/character you use has high-quality design.*
- **Consistent Visual Language:** Minimalist design, heavy emotional resonance.
- **Subtle Calls to Reflect:** Not preachy, but powerful.
- **Thematic Range:** Touches on self-worth, mindset, relationships, motivation, and mental health.

Why The Good Dictionary Works as a Social Brand MVP:

1. **Niche with Depth:** It owns a very specific emotional lane: reflection meets poetry meets healing. That's a niche — and a deep one.
2. **Scalable Identity:** The word-definition format and heart character are expandable to merch, books, decks, or even live events. But it all starts with consistent, *sticky* content.
3. **Emotional Stickiness:** People don't just scroll past — they *feel*. They save, share, and return. That's what you want.

4. **Faceless but Personal:** The lack of a human face on the brand actually gives *everyone* space to see themselves in it. It adds to the minimal aesthetic.
 5. **MVP-Ready:** The current Instagram format is already a minimum viable brand. The only next move is data: What do followers want more of? That's where market research + content testing comes in.
-

INTRODUCTION: OVERVIEW OF THE ANALYSIS

Most creators post content — few know how to turn that content into a profitable business. This analysis helps you map out the most viable path forward based on market demand, brand potential, and future products — whether that's a book, digital course, or even an app.

Did you know that 42% of creative brands fail? It's not because the idea wasn't powerful. It's because they skipped the research.

The Good Dictionary is *more than a page* — it's a movement around self-reflection, mental wellness, and mindset growth. But before building products, games, merch, or even an app, there's one step that can't be skipped:

Understanding your audience.

At Portboost, we take your vision and plug it into real-world data.

- ✓ What your audience is craving
- ✓ What products they'd actually buy
- ✓ How to stand out from similar pages
- ✓ Where your brand fits in the market

At Portboost, we use AI and strategic frameworks to analyze your brand vision against real-world data. You'll walk away knowing what to build, who to build it for, and how to do it *right*.

Not sure what direction to take your brand? With our analysis, you'll know if a book, game, app, or merch line is worth investing in — and why. No more guessing. No more throwing spaghetti at the wall.

Build The Good Dictionary into a brand that lasts.
Start with facts. Move with clarity. Create with purpose.

STEP 1: MARKET ANALYSIS

Here's a **targeted market analysis** tailored to *The Good Dictionary* — covering audience demographics, market size, trends, and essentials:

A. Audience Demographics (Instagram-focused)

- **Platform reach:** Instagram has ~**2billion monthly active users** globally.
- **Age demographic:**
 - ~30% aged **18–24**
 - ~29–31% aged **25–34**
 - ~Over **60%** are under 35 — ideal for a mindset/self-reflection brand
- **Gender balance:** Roughly **50–51% female**, 48–49% male — slightly female-leaning but broadly inclusive.

GenZ & Millennials (18–34), who seek emotional and mindset content on Instagram.

B. Market Context & Opportunity

- **Content Need:** Emotional content drives 8–10x engagement over standard growth content.
- **Emotional Vulnerability:** 87% of young people say social media negatively impacts self-esteem; 60% report depressive or anxious reactions.
- **Therapist–Creator Model Works:** Example: Clinically-trained creators like Nedra Glover Tawwab have grown massive followings (~1.8M IG users) by offering accessible mental-health wisdom, not diagnosis.

IG business accounts add ~0.86% monthly follower growth organically.

C. Market Size & Growth Trends

- **Self-improvement content:** In The broader self-help industry (books, prompts, journaling tools) was valued at ~\$11B in U.S. alone (2013) and has grown significantly since.
- **Digital ad spend:** Social media ad spend is projected to surpass **\$220B in 2024**, with Instagram commanding over **\$70B** of that—highlighting monetization potential on the platform.

Why This Matters for The Good Dictionary

- **Platform alignment:** Instagram's core demographic is the exact age group engaging with mindset and mental health content.
- **Emotional demand:** People increasingly turn to IG as therapy-adjacent content—doing “digital self-work” in their feed.
- **Retention potential:** Branding that encourages journaling, redefines language, visual identity with the heart character — becomes sticky, share-worthy, and repeat-viewed.
- **Monetization runway:** With emotional trust built, options like PDF journals, decks, memberships, or merch can capture a share of the growing self-care economy.

NOTE: By understanding these psychographics, you can design features and marketing strategies that speak directly to their needs and emotions, making your scheduling app for kids an indispensable tool for their lifestyle.

STEP 2: PSYCHOGRAPHICS

Understanding the psychographics of The Good Dictionary's community is essential to building a brand that deeply resonates and grows authentically:

Values and Priorities:

- Followers value **emotional intelligence, introspection, and clarity** in how they relate to themselves and the world.
- They prioritize **gentle self-growth**, authenticity, and content that encourages thoughtfulness, not performance.
- They are drawn to **aesthetic minimalism**, subtle encouragement, and reminders to slow down and reflect.

Lifestyle:

- These are socially conscious individuals, often creative, who engage with reflective practices like journaling, poetry, meditation, or slow living..
- Many are **digitally native**, but intentionally curate their feeds to **limit toxicity and promote mindful content**.
- They're likely to follow accounts centered on mental wellness, emotional healing, self-worth, and self-expression.

Pain Points:

- Struggle with **overwhelm, burnout, and information fatigue** from content overload on social media.
- Often deal with self-doubt, imposter syndrome, or feeling “not enough”, especially in comparison-driven spaces.
- Desire **safe, grounded spaces** online that affirm without preaching and offer emotional resonance without emotional labor.

Implications for The Good Dictionary's Growth & Brand Direction:

.

Build Emotional Utility:

- Don't just inspire—**help people language their feelings** and build new perspectives. Word-definition posts are powerful because they name emotions people can't express.

Encourage Interaction Through Reflection:

- Create saveable and shareable content that feels **personally validating**, like a quiet mirror.
- Use carousel prompts, question stickers, or story templates to subtly invite reflection and response..

Slow-Burn Brand Loyalty:

- Don't just inspire—**help people language their feelings** and build new perspectives. Word-definition posts are powerful because they name emotions people can't express.
- This makes them ideal long-term community members and customers once emotional trust is established.

Examples of Future Offer Ideas That Match Their Psychographics:

- Thoughtfully designed journals or reflection decks
- Emotional vocabulary tools or posters (physical or digital)
- A limited, poetic **coffee-table-style book** featuring definitions and the heart characters
- Mental health collabs or activations with aligned therapists or creatorsn decks
- Guided “word of the week” audio reflections or story series

NOTE: Based on the psychographic insights, your audience is introspective and craves meaning, - you can consider testing interactive content like story prompts, question boxes, or carousel reflections that encourage followers to apply the "word of the day" to their own life, etc. Focus on active audience engagement to validate psychographics.

Specifically: Use Instagram Stories, polls, and direct questions to your followers about their struggles, needs, and what content or products they want. Collect and analyze that real feedback to guide your content themes and product development—don't guess, let your audience tell you exactly what they need.

STEP 3: COMPETITION ANALYSIS (TOP 5 SOCIAL MEDIA BRANDS IN THE WELLNESS SPACE)

Based on your request, here's an updated analysis of the top five family scheduling apps, including their strengths, weaknesses, market presence, and how your app idea differentiates itself:

1. We're Not Really Strangers (@werenotreallystrangers)

- **Established:** 2016
- **Strengths:**
 - Deep, meaningful content with question cards that spark emotional conversations
 - Strong community engagement with interactive challenges and shareable posts
 - Expanded revenue streams: physical card games, merch, celebrity collaborations
- **Weaknesses:**
 - Heavy focus on questions/conversation starters, less on uplifting affirmations
 - Visual branding is minimalist but not highly unique or mascot-driven
- **Market Presence:**
 - International, millions of followers, widely recognized in mental wellness and social connection niches

2. The Daily Stoic (@dailystoic)

- **Established:** 2016
- **Strengths:**
 - Strong philosophical backbone with stoicism-based practical wisdom
 - Multi-channel presence: books, podcasts, courses, live events
 - Clear, focused messaging appealing to thoughtful growth seekers
- **Weaknesses:**
 - Can feel a bit formal or inaccessible to younger or casual audiences
 - Limited emotional warmth or community interactivity on social media
- **Market Presence:**
 - Large, global audience with strong book sales and course enrollments

3. Jay Shetty (@jayshetty)

- **Established:** 2016-17
- **Strengths:**
 - High-quality, cinematic video content with emotional storytelling
 - Huge viral reach and celebrity collaborations
 - Offers paid courses and coaching for monetization
- **Weaknesses:**
 - Brand can feel polished and corporate, potentially less relatable to some audiences
 - Content volume and production are resource-intensive, hard for smaller brands to compete with

- **Market Presence:**
 - Massive global following across multiple platforms, strong course sales

4. Rupi Kaur (@rupikaur_)

- **Established:** 2015-16 (major traction)
- **Strengths:**
 - Emotionally raw, minimalist poetry that resonates deeply
 - Strong fanbase with bestselling books and merch
 - Artistic and authentic storytelling style
- **Weaknesses:**
 - Narrow content focus on poetry, less educational or practical mindset content
 - Limited interactive community features on social media
- **Market Presence:**
 - Large, dedicated global audience mainly among younger women and poetry lovers

5. The Love Language (@thelovelanguage)

- **Established:** Around 2018
- **Strengths:**
 - Focus on emotional intelligence, relationships, and self-care
 - Highly shareable reels and carousel posts
 - Monetizes through coaching, workshops, and merch

- **Weaknesses:**
 - Content mainly focused on relationships, less on holistic self-worth or mindset
 - Smaller follower base and lower brand recognition compared to others here
- **Market Presence:**
 - Growing but niche audience in emotional intelligence and relationship coaching

NOTE: If you choose to incorporate a mascot into The Good Dictionary brand, it's important to ensure it meets the following criteria:

- **High-quality design:** The mascot must be professionally and thoughtfully designed to visually represent the brand in a polished and appealing way.
- **Meaningful connection:** It should resonate emotionally with your audience and clearly reflect your brand's core values and messaging.
- **Consistent use:** The mascot needs to be applied consistently across all brand touchpoints to build recognition and familiarity.

That said, the most critical factors for brand success are **value and authentic voice**. A mascot alone will not differentiate your brand or build a loyal following if the content does not consistently deliver meaningful insights and engagement. The mascot serves as a visual tool to support and amplify your message. To stand out effectively, The Good Dictionary should continue to focus on:

- Delivering unique, thought-provoking word-definition content that inspires self-reflection and growth
- Building authentic connections through storytelling and user-generated contributions related to those definitions

- Encouraging active community engagement via interactive prompts, challenges, or shared experiences

For example, a weekly series inviting followers to submit their own “good definitions” could foster community and deepen engagement — creating lasting value beyond visual branding elements.

GROWTH & ENGAGEMENT ROADMAP FOR THE GOOD DICTIONARY

To grow effectively and save time, **hiring a social media manager early on is highly recommended**. A good manager can help create consistent content, run ads, manage engagement, and track analytics — accelerating growth and building a loyal community faster than doing it solo.

Phase 1: Build Engagement & Grow Followers

- **(Optional) Hire a Social Media Manager:**
Invest in a reputable social media manager within your budget to plan content, run targeted Instagram ads, and manage follower engagement.
- **Consistent, High-Value Content:**
Post consistently with unique word-definitions tied to mental health, self-worth, and mindset growth. Use simple visuals, carousel posts, and reels.
- **Interactive Content options:**
Use polls, quizzes, and question stickers on Instagram Stories asking followers to share their own “good definitions” or experiences related to a word.
- **Community Features ideas:**
Launch a hashtag campaign like #MyGoodDefinition for

followers to tag their own posts, creating user-generated content and organic reach.

- **Collaborations & Features options:**
Partner with micro-influencers or other mindset/mental health pages for shoutouts, guest posts, or live conversations to tap into new audiences.
- **Build Email List:**
Kickstart your email list by offering a high-value free resource—such as a “10-Day Positive Words Journal.” This step is crucial. Establishing a mailing list early allows you to build a direct relationship with your audience beyond social media. **Providing a meaningful freebie not only adds value but also builds trust—this should be one of the first strategic moves you make for your brand.**

Phase 2: Deepen Community & Test Product Ideas

- **Weekly Challenges or Prompts ideas:**
Encourage followers to engage with a “reflection word” each week, sharing stories or journaling prompts in comments or stories.
- **Live Sessions & Q&A:**
Host regular Instagram Lives or Stories Q&A to connect directly with followers, gather feedback, and build trust.
- **Surveys & Polls:**
Conduct simple surveys or polls on product ideas like merch, physical journals, or digital tools to validate demand before investing.

Phase 3: Monetization & Product Launch ideas

- **Merchandise:**
Start with simple, meaningful merch like t-shirts, hoodies, or

notebooks featuring the heart mascot and popular “good definitions.” Keep designs clean and emotional.

- **Physical/Digital Journals or Cards:**
Develop a guided journal or a set of cards based on the dictionary’s word-definitions and reflection prompts — easy to produce and sell online.
- **Digital Community or App (Long Term):**
Once the audience and engagement grow significantly, consider building an app or community platform that gamifies self-reflection, offers daily prompts, and tracks progress.
- **Workshops or Coaching (Optional):**
If the founder wants to leverage personal expertise, offer paid group workshops or coaching sessions around mindset and self-worth.

What to Sell & When?

- **Best Early Products:**
Merch and guided journals/cards. They have low barriers to entry, align perfectly with the brand’s content, and give followers tangible value.
- **Mid-Term Products:**
Paid workshops, coaching, or digital downloads once a loyal community is established.
- **Long-Term Products:**
A custom app or subscription-based community platform that creates ongoing engagement and revenue.

NOTE: If you have the budget to hire a **social media manager**, it can significantly accelerate your brand’s growth by helping you post

consistently, manage engagement, run ads, and track analytics. However, **if you don't currently have the funds**, that's absolutely fine — you can still grow organically by following the roadmap above.

The key is to stay consistent with **high-quality, value-driven content**, and engage daily with your target audience by commenting, responding to DMs, running polls, and interacting with other creators in your space. Growth is absolutely possible without outside help — and when you're ready to invest, hiring a manager can multiply your reach.

Also, keep in mind: A huge part of building a successful brand is *testing*. You won't truly know which products, content formats, or messages resonate until you experiment. That's why it's essential to try a variety of materials—reflection prompts, different merch styles, digital freebies, journals—and track what sparks the most engagement or feedback. Use tools like polls, DMs, and comment sections to actively gather audience insights and refine your direction.

***Based on current market data and audience behavior**, we've recommended journals, guided card sets, and soft merch like tees and hoodies because these tend to perform well in your niche — but the real proof will come from testing them directly with your community.

Bottom line: Whether you hire help or grow on your own, consistency, connection, and testing will be the three pillars that carry your brand forward. Keep showing up, stay curious, and let your community guide your next moves.

A: PRODUCT POSITIONING MATRIX

A simple grid showing **Value vs. Effort** for product ideas. Prioritize items that are high-value but lower effort to start.

| Product | Perceived Value | Effort to Build | Launch Timing |
|--------------------------|-----------------|-----------------|---------------|
| Digital Journal PDF | High | Low | Now |
| T-shirt (word + heart) | Medium | Medium | Soon |
| Card Deck | High | Medium | Soon |
| App/Community Platform | Very High | Very High | Later |
| Guided Reflection Course | High | High | Later |

Starting with a digital product or service is a smart, low-barrier entry point—and an excellent way to begin building momentum. It's something you can start developing right away. If you ever need support creating a journal, t-shirt, course, or even an app down the line, we're here to help guide you in the right direction.

B: FOLLOWER PERSONA PROFILES (EXAMPLE-BASED PSYCHOGRAPHICS)

(Optional) You could break the audience down into 2–3 relatable mini-profiles. This humanizes the data and helps guide content/product tone.

EXAMPLES:

- **"The Reflective Seeker"** – 26 y/o woman, journaling daily, follows mindfulness pages, struggles with self-doubt, craves clarity and self-worth tools.

- "**The Recovering Overthinker**" – 32 y/o man, healing from burnout or breakup, looking for emotional growth and self-coaching tools.
- "**The Young Visionary**" – 19 y/o creative student, obsessed with aesthetic self-help content, reposts deep quotes, potential merch buyer.

This allows The Good Dictionary to build posts *for someone specific*.

C: COMMUNITY HOOK PHRASES & ENGAGEMENT SCRIPTS

(Optional) Here a few engagement options for your page.

Prompt Examples:

- "Define love in your own words "
- "Drop a word you wish someone had told you when you were struggling "
- "If you could redefine 'failure,' what would it mean to you?"

These are simple but **emotionally compelling** CTAs that drive saves, shares, and comments.

D: TOOL STACK RECOMMENDATIONS

(Optional) Here a few platforms/tools you can use to streamline your work:

Content Creation: Canva, Adobe Express

Scheduling: Later, Metricool, Planoly

Link-in-Bio: Beacons, Stan Store (sell early merch or PDFs)

Email List: ConvertKit (free for beginners), Mailchimp

Polls/Surveys: Typeform, Google Forms

Analytics: IG Insights + Notion tracking dashboard

E: FOUNDER FOCUS ADVICE

Give them what *no one else says* — mindset coaching for themselves.

Your consistency matters more than perfection. Done > perfect.

Your voice is the value. Your lived experience = what connects.

Don't be afraid to show vulnerability. Your realness is your brand's trust currency.

BONUS: PORTBOOST
**BRAND IDEA
PROFITABILITY
CALCULATOR**

This tool evaluates the potential profitability and viability of **The Good Dictionary** brand by scoring 5 key areas. Each factor is scored from 1–10 to generate a total **Profitability Score (PS)** out of 50:

1. Market Demand (MD):

The level of interest in your app idea in the market. A higher score indicates strong demand for the app's solution.

2. Competition (C):

The number of competitors and their performance. A higher score means there's less competition in the niche, and the market is less saturated.

3. Revenue Potential (R):

The ability of the app to generate revenue from various monetization models (subscriptions, ads, in-app purchases, etc.).

4. Audience Acquisition Feasibility (UA):

The ease of reaching your target audience and acquiring users effectively.

5. Development Feasibility (D):

The difficulty level of building the brand products/services from a technical perspective.

Each factor is rated on a scale from **1 to 10**, and the **Profitability Score** is calculated using the following formula: **Profitability Score Formula**

PROFITABILITY CALCULATOR FOR THE GOOD DICTIONARY:

The profitability calculator evaluates the brand's potential success using five key metrics: Market Demand, Competition, Revenue Potential, Audience Acquisition Feasibility, and Development Feasibility. Each metric is scored on a scale from 1 to 10. The total score indicates the overall profitability potential of the app.

1. MARKET DEMAND (MD)

- **Why It Matters:** High market demand indicates that the brand is aligned with rising interests in self-help, mental wellness, and reflective content.
- **Scoring Factors:**
 - Rising awareness around mental health & emotional intelligence
 - Instagram is still a major discovery tool for mindset & healing content
 - "Wellness" and "Self-worth" are trending topics globally

Score: 9 (This brand sits squarely in a high-demand mental wellness & self-reflection niche with wide appeal)

2. COMPETITION (C)

- **Why It Matters:** Less competition (or clear differentiation) allows faster growth and loyalty building.
- **Scoring Factors:**
 - Highly saturated space: many quote, poetry, and wellness pages
 - “Word-definition” angle offers *unique differentiation*

Score: 6 (Competition is fierce, but strong branding and format consistency help it stand out).

3. REVENUE POTENTIAL (R)

- **Why It Matters:** A brand must have viable paths to monetize through merch, journals, workshops, or even digital products.
- **Scoring Factors:**
 - Merch with emotional resonance (definitions on shirts, mugs, cards).
 - Digital or physical reflection journals or card decks).

- Future potential for community-based membership or low-cost courses.
- Data shows emotional/wellness merch has **higher-than-average conversion rates** on Instagram.

Score: 8 (Highly monetizable through print-based or emotional wellness products).

4. AUDIENCE ACQUISITION FEASIBILITY (AUF)

- **Why It Matters:** Your ability to attract and retain followers organically or through ads drives brand growth.
- **Scoring Factors:**
 - Visually engaging, emotionally resonant content performs well on Instagram.
 - UGC opportunities (follower-submitted definitions) drive organic reach
 - Niche communities around healing & journaling are active and sharable
 - Paid ad potential once a product is introduced

Score: 9 (Great organic growth potential paired with future paid ad scalability.).

5. DEVELOPMENT FEASIBILITY (D)

- **Why It Matters:** Simpler brands/products cost less to build and test, accelerating ROI.
- **Scoring Factors:**
 - Low barrier to entry: start with Instagram, Canva, and community-building
 - Merch: print-on-demand (low overhead)
 - Journals/cards: low-cost prototypes and fulfillment.

- No app or major tech needed at MVP stage

Score: 9 (Very easy to build and scale without technical barriers.).

Total Profitability Score: 41/50

Interpretation:

- **40-50:** High-Potential Brand.
 - This brand has strong product-market alignment, low development overhead, and high emotional resonance. With the right execution, it has the potential to become a standout digital wellness brand.
-

IMPORTANT: SUGGESTED NEXT STEPS

This Brand Idea Profitability Analysis has offered valuable insights into the growth and monetization potential of your brand. Now it's time to move from reflection to action.

Immediate Priority: Build Your Mailing List

Start collecting emails *now*. Building a mailing list is one of the highest ROI moves you can make. It gives you a direct, owned connection to your audience that doesn't rely on social media algorithms.

How to Start:

- Create a simple **free digital product or service** that delivers real value.

- Example: A short “*10-Day Positive Words Journal*,” an *eBook*, or a *printable worksheet*.
- Make sure it’s useful, unique, and aligned with your mission.
 - Add a personal touch. The more authentic it is to *you*, the more it will resonate with your audience.

Need help creating your journal, PDF, or digital product? We can help with design, layout, and structure.

Launch a One-Page Website (Landing Page)

You don’t need a full website—but you *do* need a clean, focused landing page with a clear CTA to download your free offer and join your list.

Options:

- Use a free tool like **ConvertKit**, **Carrd**, or **ConvertFlow** to build this quickly.
- Include a sign-up form, brief description of your brand, and strong call-to-action.
- Collect names + emails and start your list.

If you’d like help setting this up, we’re happy to assist with a one-page landing page.

Create a Monthly Newsletter

Once your list starts growing, stay in touch. Start small. Commit to **one email per month**—a simple newsletter that brings value.

Tips:

- Share reflections, definitions, personal stories, or exclusive insights.

- Keep it authentic. Your unique voice is your strongest asset.
- Think of it as a letter *from you to them*.

If you need help writing or structuring your newsletter, we can support that too.

Build a Welcome Email Automation

When someone signs up, don't just say "thanks"—give them a reason to stick around.

Set up a **5–10 day welcome series** to introduce new subscribers to:

- Your brand story
- The heart behind *The Good Dictionary*
- Bonus insights or exercises
- What they can expect next

You can create this using email platforms like ActiveCampaign. If you'd like help writing or automating this, just let us know.

Product-Market Fit & Testing

Remember: *Half of building a brand is testing.*

You won't know what content, products, or formats resonate best until you try them.

Start experimenting with:

- Digital journals
- Printable cards
- eBooks
- Reflection prompts

- Newsletter themes
Use polls, DMs, and story replies to gather feedback and listen closely to what your audience wants.

The strongest brands listen more than they speak—and evolve through feedback.

What to Sell & When

Based on market demand and similar brand benchmarks, the *best low-cost starting offers* include:

- Guided digital journals
- Reflection eBooks
- Printable affirmation or prompt cards
These align directly with your brand identity, have low production cost, and are easy to distribute digitally.
- As your list grows and audience engagement deepens, explore:
- Merch (shirts, hoodies with your words/definitions)
- Workshops or coaching (if you're open to showing up personally)
- Physical journals or card sets
Eventually: a possible app or digital platform

FINAL NOTE: You don't need a huge budget to get started. But if/when funds allow, hiring a **social media manager** or **digital marketer** can dramatically increase your growth by:

- Running ads to grow your mailing list
- Optimizing your landing page
- Helping you automate email flows
- Planning content that drives conversions

You can grow organically now by showing up, adding consistent value, and engaging daily.

But when you're ready to scale, working with a professional can fast-track results.

You've done what many creators never do—invest in strategy before guessing.

Now it's time to act.

Start building your list.

Start building your product.

Start building your brand.

We're here if you need support at any stage.

Don't be another statistic.

If you need further assistance or have any questions, don't hesitate to reach out. We're here to help. In the meantime congratulate yourself on requesting this service and taking the first step in turning your app idea into a reality. Correctly. #BuildYourDream

CASE STUDY

One of Our Latest Clients: Sign Too!

Sign Too! is a sign language application designed to make learning sign language engaging and accessible. When the founder came to us, they had a strong idea but lacked the detailed insights needed to refine and validate it.

Through our comprehensive app idea breakdown, we uncovered a key insight: their target audience, ages 5 to 25, particularly the younger segment, preferred learning through educational games. This demographic insight revealed an opportunity to enhance the app's value.

Based on our analysis of their audience's demographics, psychographics, and preferences, we recommended adding a unique educational game to the app. This feature solved a critical pain point no other sign language app was addressing.

The founder implemented this feature and refined their overall concept, giving their app a significant competitive advantage. By aligning the app with their audience's needs, they positioned it for stronger market appeal and, hypothetically, increased profitability when it launches.

This is the power of knowing your numbers and understanding your audience. With data-backed insights, we helped Sign Too! take their app idea to the next level.

This service is a must-have—it's the first step in turning your **app or brand** idea into a reality. Correctly.

The Four Steps to Building a Successful App:

1. **Know your audience** – Understand who they are and what they need. (Know your numbers)
2. **Talk to your audience** – Conduct interviews to validate your assumptions.
3. **Build your app** – Create a product that meets their needs.

4. **Build a pre-launch audience** – Get people excited about your app before it's even live so you can launch with instant buzz.
-

BONUSES

1. QUICK CALL:

A free 30-minute call to explain the PDF and answer any questions.

2. 10% CREDIT TOWARDS PORTBOOST SERVICES

As a thank you for your video testimonial, you'll receive a 10% discount on and of our team services! This credit is valid for 12 months from the date of your report.

VIDEO TESTIMONIAL

Thank you for requesting this service for your brand idea! If you genuinely loved the experience and found real value in it, we would greatly appreciate a brief video testimonial. This helps us improve and also inspires others to take the next step in building their app dreams. Here are the questions for you to answer in your testimonial:

1. **What did you like most about this service, and why? Is there anything you would change about the service or anything you think could be improved?**

Please share your honest thoughts - we value your genuine feedback and look forward to hearing how we've been able to assist you. Glad to be part of your app journey. #BuildSomethingBeautiful

**“we don’t just help you build an app, we help you
build a company. Correctly.”**

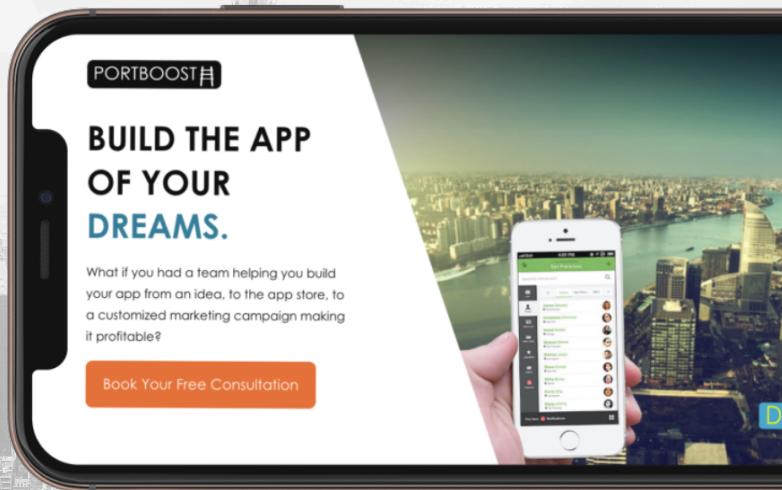

- Danso Gordon,
CEO/Owner
